

## Animal Highlight:

Species: Indian Rhino

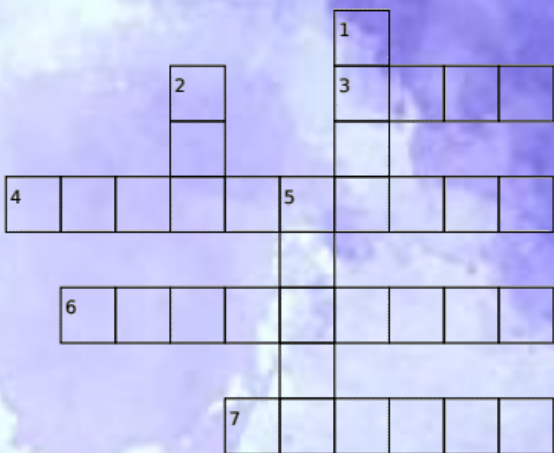

Name: Rupert

### Fun Facts:

- ❖ They are the biggest rhino in Asia!
- ❖ They are solitary animals and prefer to be alone, but will travel in small groups-especially if there is food and water nearby!
- ❖ Rhinos can make up to 10 different sounds-including snorts, honks, and roars!
- ❖ They are herbivores and eat grass, fruit, and crops! They also enjoy mineral licks!
- ❖ They love to swim and wade in water!

## What Have You Learned?

**Down:**

1. Indian rhinos are the biggest rhinos in \_\_\_\_
2. how many different sound can a rhino make
5. what animal is this page about

**Across:**

3. Indian rhinos love to \_\_\_\_
4. rhinos are \_\_\_\_ in the wild
6. an animal that eats grass, fruits, and crops
7. what can you do to help rhinos

## Great News!

- ❖ The Indian Rhino has gone from having fewer than 200 individuals to now over 3,600 in India and Nepal.

## How you can Help:

- ❖ Rhinos are still vulnerable in the wild due to poachers and loss of habitat so what can you do?
- ❖ Donate to your local zoo or wildlife conservation.
- ❖ Don't purchase rhino horn products.
- ❖ Adopt a rhino!
